

DEVELOP YOUR COLLABORATIVE DESIGN SKILLS

22505VIC Course in Multi-Disciplinary Design

NEW!

Are you a current or past student of the following disciplines at The Gordon?

- Building, Construction or Engineering
- Fashion Design
- Graphic Design / Digital Media
- Information Technology or Computer Systems Engineering
- Interior Design
- Visual Arts

Are you ready to?

- Work on a real life industry project
- Personally connect with local industry
- Collaborate with students and teachers from different disciplines
- Develop your online project management skills
- Be part of a brand new program – No fees to pay for the pilot
- Commit to an intensive blended learning program, scheduled outside your current course hours

Local industry tell us they want their employees to be more connected with real life industry issues. They want staff to have an awareness of the value of collaborative work across disciplines, and to have greater exposure to this prior to joining the workforce. This course will appeal to those who want to explore the application of a multi-disciplinary approach to creative thinking in the design process.

The Gordon is offering a limited number of enthusiastic students the opportunity to participate in a pilot program FREE OF CHARGE. It is structured so you can complete the course outside your current course commitments.

Course structure

The Pilot course will commence in January 2020 for 13 weeks and consist of:

- 6 hour face to face induction workshop
- 3 weeks online delivery
- 1 week face to face delivery
- 7 weeks online delivery
- 2 weeks face to face delivery

Students should allow up to 5 hours per week to study during the online and project phases, and up to 30 hours per week during the face to face class attendance delivery.

Units of competency

You will complete the following four accredited Units:

- VU22716 Investigate the design industry and the role of a designer
- VU22717 Create design solution using a collaborative multi-disciplinary approach
- BSBCRT301 Develop and extend critical and creative thinking skills
- CUAPPR602 Collaborate in professional creative projects

On successful completion, you will receive a Statement of Attainment from The Gordon for the 22505VIC Course in Multi-Disciplinary Design.

Course outcomes

Students will develop and/or expand their design capability through the application of a collaborative, multi-disciplinary approach to creative thinking in the design process.

The course recognises that learners already have expertise in their own design field. They are expected, through their activities and assessments, to bring this expertise and capability to

a multidisciplinary design project they will work on with learners from other design fields. Students will learn about discipline boundaries, and how to collaborate effectively to overcome them to improve design outcomes. Students will apply a range of online learning and project management tools to aid the collaborative process.

Costs

This pilot program is free of charge to students who are selected to participate. There are no material fees for the pilot.

Further information
